# Standard toilet paper dispenser

## GUIDE SPECIFICATION

Manual standard toilet paper dispenser for double or triple rolls shall be wall-mounted. The empty dispenser shall weigh 0.9 kg for double rolls or 1.3 kg for triple rolls. The housing shall be made of steel with a white finish, or of AISI 304 stainless steel with a polished or satin finish. The body and the cover shall have a thickness of 0.8 mm. It shall be fixed to the wall using 3 screws and 3 wall plugs. The dispenser shall accommodate toilet paper rolls with a diameter between 105–125 mm and a maximum width of 105 mm.

## ASSEMBLY / RECOMMENDED INSTALLATION HEIGHTS

Secure the toilet paper dispenser to the wall at 650–750 mm from the floor to the bottom point, using stainless steel screws and through the holes in its rear mounting plate (holes marked with an "S" in the figure below).

Mediclinics S.A. reserves the right to make changes or modifications to the products and their specifications without prior notice.
