### General Description

- Automatic wall-mounted soap dispenser of 1L capacity, manufactured in stainless steel AISI 304 0,8 mm thickness.
- Allows for three different types of soap (liquid, foam or spray). To use different soap type than the one originally purchased, the corresponding internal component must be acquired separately.
- Available in four finishes (white, matte black, bright and satin), these soap dispensers have a functional, robust and trendy design that matches the new range of Mediclinics bathroom accessories. This allows this soap dispenser to blend into any space perfectly.
- Suitable for high traffic facilities and for public use.
- Dispenses liquid soaps or hydroalcoholic gels, foam soap, or disinfectant spray depending on the selected version
- Operates on 6 AA alkaline batteries (not provided) or **optionally**, with an AC adapter 9V 1A (not provided, soap dispenser code + "-TRAFO").
- It is mounted on the wall by means of four Ø4 stainless steel screws (provided) with their corresponding Ø 6mm plastic plugs (also provided).

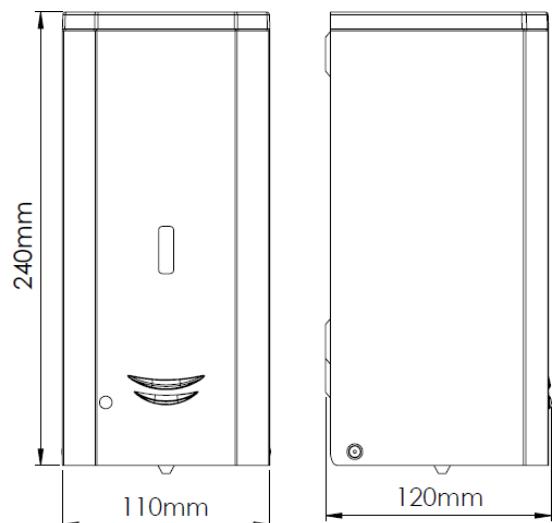

### Components & materials

- BODY:** made of stainless steel AISI 304 four finishes.
- HINGED COVER:** for operator convenience and speed of service. Opening on top with provided Mediclinics key that allows soap refill.
- WALL PLATE:** made of stainless steel AISI 304 0,8 mm thickness. It is mounted on the wall by means of four Ø4 stainless steel screws (provided) with their corresponding Ø 6mm plastic plugs (also provided).
- INNER PLASTIC TANK:** made of plastic material, it prevents oxidation and that can be easily removed for cleaning and disinfection purposes.
- LEVEL DISPLAY:** made of PVC and placed in the front part. It indicates the level of soap available inside the soap dispenser constantly.
- VALVE:** anti-drip corrosion resistant valve that dispenses 1.5 ml of soap per service. This anti-drip valve, which dispenses liquid soap, is easily interchangeable with the valves of the other soap dispensers of the same line.

## MOUNTING TEMPLATE

---

Fix the soap dispenser through the holes of the wall and floor plates, using the stainless steel screws supplied and taking into account the distances of the points indicated by an "S" in the next figure:

**VERY IMPORTANT:** do not install this soap dispenser inside the shower, as its electrical components can be seriously damaged by water and the dispenser stops working. If you choose the configuration with an electric converter, install it away from any source of water.
