

RECESSED

Manual operated

DJ0121C
Bright finish

General description

- Liquid soap dispenser, manually operated by means of a push-button, with a capacity of 0,5L, to recess directly into the countertop.
- The soap dispenser is made of white polyethylene tank, a head and a height-adjustable threaded rod, both made of chrome-plated brass with a bright finish.
- With a functional and robust design, this soap dispenser is suitable for medium-high frequency traffic bathrooms and it blends perfectly in any bathroom environment. Model suitable for collectivities.
- Tank re-filling is done through the cover on the top of the dispenser by unscrewing it with the supplied special key.
- Dispenses hygienic liquid hand soaps with neutral and chlorine free PH. Support disinfectant solutions, liquid soaps or the hydro-alcoholic gel.
