

BtM**Cabinet with mirror +
soap – air pictograms****BTM10 (closed)****General description BTM10:**

- Complete sanitary cabinet with mirror, pictograms and locker, designed to house electric soap dispenser and hand dryer modules. Modules are not included - to be placed by the user.
- Cabinet made from black wood with matt finish, with a front door that includes a mirror.
- The mirror has frontal backlit pictograms for each function (soap and air).
- The door top hung opened, is key locked and has 2 pneumatic pistons that helps the opening and closing process.
- A single electrical point is enough to power all the cabinet elements and pictogram backlights.
- If the mirror is broken no mirror pieces will fall down.
- Available with paper dispenser pictogram instead of a hand dryer pictogram, model BTM11.
- Easy to install cabinet.

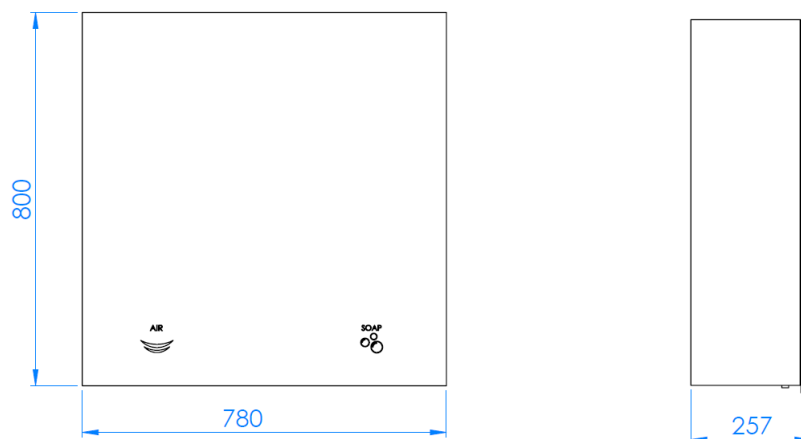

Components and materials:

- Wood structure made from black DM with matt finish
- Front door with mirror
- Pictograms for soap and hand dryer
- 2 available Schuko plugs for soap dispenser and hand dryer.

Operation behind the mirror cabinet

- Cabinet designed to house a comprehensive drying and washing system (soap dispenser and hand dryer) that is activated automatically when the hands are placed under the sensors. The modules are hidden behind the mirror to provide an avant-garde design to the space.
